THIS IS UNEVALUATED INFORMATION

25X1

1. A new industrial plant is being built in Almasfuzito. It is part of the "Dunavölgyi Timföldipar" (the Alumina Industry of the Danube Basin), a Russo-Hungarian enterprise for the exploitation of bauxite and aluminum.
2. The plant will produce alumina using the Bayer system. The raw material, bauxite, is to come from the mines at Iskaszentgyörgy. The plant is connected to the Almasfuzito station by a railroad line.
3. The output of the new plant is planned to equal the combined production of the two other alumina plants that now exist in Hungary.
